

Daniel Ramón Pérez

Full-Stack Developer

Barcelona, Spain

Phone: +34 672226319 **Email:** danielramonperez@hotmail.com **LinkedIn:** linkedin.com/in/daniel-ramón-pérez

PROFILE

Full-Stack Developer with over 3 years of experience in web applications and management systems, specializing in Angular/TypeScript and Java/Spring with SQL Server. Experience in healthcare applications, ERP systems and REST APIs, including feature development, implementation of rules and validations, issue resolution, and direct collaboration with clients and international teams.

SKILLS

Programming languages: Java · TypeScript · JavaScript · Python

Technologies: Angular · Spring Boot · SQL Server · WinDev

Languages: Spanish (Native) · English B2 First (Cambridge)

EXPERIENCE

Full-Stack Developer | CROS Ingenieros

02/2023–03/2026

Healthcare software and ERP systems in production environments.

- Development of hospital management web applications with Angular and TypeScript, and REST services with Java/Spring on SQL Server.
- Design and implementation of modules for medication administration, chemotherapy sessions, patient management, and wristband/label printing.
- Implementation of domain logic and security controls: dose ranges, double-verification workflows, line/channel selection, protocol steps, and user/role restrictions.
- Development of ERP applications with WinDev for production, stock control and machinery monitoring, as well as direct technical support for clients.

Backend Developer | GiroHosting SL

01/2022–06/2022

Backend development for CRM platforms supporting commercial management and sales processes.

- Backend development of CRM applications and microservices with Java/Spring Boot: REST APIs for accounts, contacts and opportunities; search, filtering and pagination.
- Optimization of data architecture and SQL Server query performance.

EDUCATION

Bachelor's Degree in Computer Engineering | UAB

2020–2022

Higher Technician in Multiplatform Application Development | IFP

2018–2020
